DYNAMIC **HD** IMAGING®

HIGH DEFINITION INKJET PORCELAIN

MEDITERRANEA-USA.COM

StonePeak Factory, Crossville, TN

Founded in 1987 by Michael Mariutto, Mediterranea has grown from humble beginnings to become one of the worldwide leaders in porcelain tile design. In the mid-1990s, the company launched the groundbreaking Tuscania collection, one of the very first tile series designed with Roto-Color technology, revolutionary at the time for vastly increasing the number of high-definition graphics.

In its earlier years, Mediterranea partnered with factories on four continents to produce tile worldwide. From the U.S. to Italy, Turkey, Brazil and Argentina, Mediterranea's factory partnerships distinguished the company from the competition, and provided a global manufacturing footprint to suit the architectural and design needs of its U.S. client base.

In 2006, the Mediterranea brand merged with StonePeak and the Iris Ceramica Group, expanding Mediterranea's production capacity and technological innovation. Today, as design has transitioned into high-definition inkjet technology, Mediterranea has continued to lead the way with its Dynamic HD Imaging® design process -- delivering distinctive looks, aimed squarely at the U.S. market. Many of the series designed with this technology are legends in the industry, including American Naturals, Boardwalk, Marmol Collection and Touch. The QUANTUM brand brings the world of large-format porcelain panels into the company's portfolio, featuring sizes up to 5x10 feet, and making possible an entirely new range of design possibilities.
